DUPRRENCE IN COST.—According to a San Francisco paper, flour has heretofore been car-ried, by seasmer, from that city to New York, a distance of 5.149 milles, for three cents per pound, gold. Now, the distance between San Francisco and Prescott does not exceed 2,2000 miles by any of the present routes, yet we have to pay from and Prescott does not exceed 2,000 miles by any of the present routes, yet we have to pay from 11 to 16 cents per pound, freight, for every ar-ticle purchased and used by us, and, unless the railroad about 4 happen to be built soon, there is but one way by which we can put an end to this enormous tax upon our labor—that way is for our farmers to cease planting so much core, grow wheat, rake hogs, cattle and poultry. We can and must produce most of what we consume.

Kassas Cirr, Missouri, must be one of the liveliest inland "villages" in the Union, for no less than seven railroads centre there, and make basiness for its thirty thousand people. We contistently hope that, ere long. Prescut and Kansas City will be united by railroad, and we feel that the hope is not a vain one, for from Kansas City starts the 30th Parallel Railroad, which, as certain as fate, is destined to be built to San Franchischer.

One Enoch Hong a shad-bellied Indian Superistorduci, of Kansas, tele-graphed, under date of June 8, that accounts of recent outrage, committed by Indians in the Northwestern part of that State, were greatly reaggerated, but he does not attempt to gainay that whole families of whites were butchered by that whole families of whites were butchered by the savages. Palliation of Indian crimes seems to be a labor of love for Indian Superintendents.

The New Herwen Pax.—Louis Blanding has tested the new Hepburn pan, and gives it as his opinion that it is superior to all other grinding and amalgamating pans, for the reason that it can be run with 40 per cont. less power than any other pan, that grinding and amalgamation go on at the same time, independent of each other; that the rollers operate to cruab the coarse ore on the side dies, and palsoria on the multer dies. The rollers are free and sujest themselves to the size of the material fed to the pan, consequently, a battery in not required, but it is essential to have a "cracker," or a pair of Cornish rollers. The last great point in its favor is that it officets a great naving of quickeliver.

A Windrall.—A U. S. Paymaster arrived at Sanis Pe. New Mexico, recently, from the States, with the nice sum of \$400,000, which sum, of course, is, ere this, in circulation among the sol-dlers and citizens of our sister Territory. Montave County—Electron, src.—Under date of Hardyville, Mohave county, June 11, a friend writes that the clitzens of that county held an election, on the second day of June, and electrof officers as follows: Sheriff, A. P. Prather; Recorder, Jas. P. Balli; District Attorney, A. E. Davis; Treasurer, U.E. Boolittle; Supervisors—Wm. Forrest, Milo F. Davel and C. A. Luke.
